 Center for ECOintention

VITALIZING ORGANIZATIONS

ECOINTENTION

GET GOOD ENERGY
FLOWING THROUGH
YOUR ORGANIZATION

Mind Moves Matter

HOW ALIVE IS YOUR ORGANIZATION? IS THERE A HEALTHY FLOW? IS THERE STRESS? ARE THERE BLOCKAGES FROM OLD PATTERNS? CAN PEOPLE SOLVE PROBLEMS BY THEMSELVES?

With ECOintention you get good energy flowing through your organization. This process starts with an intake conversation after which a certified ECOintention Practitioner carries out a scan of the organization. The scan provides information about the energy in your organization. It also shows to what extent goals can be realized and transformation can be effective.

ORGANIZATIONS SCAN ON THREE LEVELS

MIND - Management - Thinking

This is the concept level where vision, mission, goals and strategy are formulated.

MOVES - Communication - Feeling

At the contact level discussions, decision-making, internal and external communication take place. Also the level for branding, marketing and PR.

MATTER - Realization - Doing

This is the workplace, the operational level. The place for action and turnover, where the rubber hits the road and results are created.

ORGANIZATION IN FLOW

In an organization that is healthy and alive, there is sufficient life energy, the organizations goals are achieved more easily and people work with pleasure and inspiration. The organization is a coherent and meaningful whole that makes its unique contribution to the world.

Qualities of an organization in flow

- The management occupies the hub of the wheel;
- Vision, mission and goals are clear;
- They are formed into strategic policy;
- And translated into concrete steps;
- The financial situation is healthy;
- It's a pleasant place to work;
- Luck seems to be more with you than against you;
- There is space for creativity and development;
- Clear internal and external communication;
- Colleagues know what they are contributing to the bigger whole.

Improve good energy

Life energy is fed by attention and directed by intention. That is why anyone can enhance the healthy forces in their organization. For this we have developed the principles of energetic guardianship. ECOintention teaches you to apply these in your daily work and life.

*I transform
old patterns and
move freely into
the future*

INTAKE

SCAN

BALANCING

STABILIZING

CONTINUATION

THREE STEPS

After the intake and scan we move on to enhancing the energy, in three phases.

1. Balancing Phase

Here the energy is brought back into balance. All the energetic values are presented in charts so that you can follow the whole process.

2. Stabilizing phase

The energy is flowing optimally in the organization. Clients often notice in this phase that calm returns to the organization.

3. Continuation Phase

The energy is well anchored. The fruits can be harvested. In this phase we pull back and you take over the energetic guardianship.

Coaching

You are coached during the whole process. You learn how your organization functions energetically, how you can steward the energy and direct it with intention. Transforming stagnant energy in the organization and old patterns in yourself are important aspects of the work.

RESULTS

ECOintention contributes to an effective organization, better communication, higher productivity and improved well-being. Managers and wardens have more time for themselves, are relaxed and have a greater chance of achieving their goals.

HOW DOES IT WORK?

Principle Everything is (life)energy
Source Einstein, quantum mechanics theory

Principle You can feel energy
Source All of us

Principle An organization also exists at an energetic level
Source Family and Organizational Constellations

Principle You can direct energy with intention
Source Books 'The Field' and 'The Intention Experiment' by Lynne McTaggart

WHAT IS ECOINTENTION?

ECOintention is a method for bringing healthy energy and flow into organizations and ecosystems. Managers and wardens are given easy steps to restore vitality of their system. By bringing the energy back and directing it with intention, productivity is increased and well-being and communication are improved.

Visible and measurable effects

The effect of ECOintention is visible and measurable with increasing vitality and healthy ecosystems often combined with greater biodiversity. For organizations it results in greater productivity, more free time, happy staff and better financial results.

Mind Moves Matter

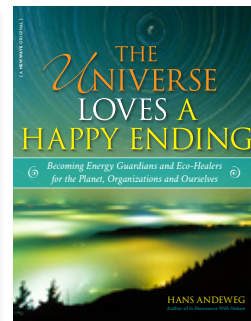

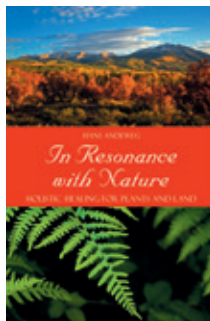

ECOintention combines modern scientific knowledge with ancient wisdom to create a practically applicable method. The basic principle is: Mind Moves Matter.

Ecointention is unique

There is no other method that both brings back a healthy energy and flow into an organization and at the same time coaches the client. This holistic approach makes awareness-raising and change processes happen more quickly and last longer.

Everything is energy

All the ancient cultures had a name for life energy: Ch'i, prana, mana, ki etc. Science talks about zero point energy. This energy is present everywhere. Life energy is fed by attention and directed by intention. That is why anyone can improve the health and vitality of organizations and nature.

The foundations for ECOintention are outlined in Hans Andeweg's books

Center for ECOintention

Center for ECOintention has more than 25 years experience in applying the method in numerous projects at small and large scales, locally and internationally. The origins of ECOintention are in agriculture and forestry. In those sectors the method lead to improved harvests and healthy ecosystems. What works for ecological systems also appears to work for economic systems.

Solid experience

Hans Andeweg (MSc) and Rijk Bols are the founders and core team of the Center for ECOintention. Working with life energy and vitalising organizations and nature is their daily work. They organize the ECOintention Practitioner vocational training. The training is recognized by the Dutch government. There is a team of ECOintention Practitioners who help them with the training and consulting.
