GROUNDED AND INSPIRED

The Intensive combines theory and practice in a beautiful location in nature where many different energies are available to explore.

Rooted in 25 years of experience in this field, this Intensive weaves together the wisdom of our ancient past with the frontier science of the future.

It helps us make a grounded and inspired contribution in the challenges of the present.

IT STARTS WITH YOU

Everything starts with you. In this Intensive you learn to ground yourself, to clean your energy, to protect your sensitivity and to connect with your higher source. Use the power of your intention and make your heart of gold.

ECOINTENTION

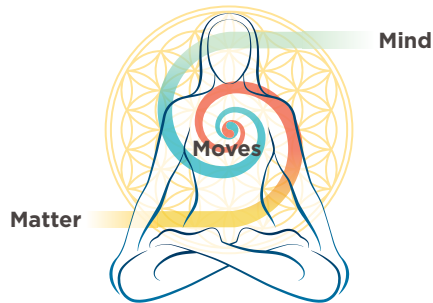

The Intensive and Follow-Up are based on ECOintention, a method for bringing energy and flow back into your life. To be healthy, grounded and in balance again.

WHAT IS ECOINTENTION?

ECOintention is a method for bringing healthy energy and flow back into organizations and ecosystems. Managers and wardens are given easy steps to restore vitality to their system. By bringing the energy back and directing it with intention, productivity is increased and well-being and communication are improved in the organization and on the land.

Mind Moves Matter

ECOintention combines modern scientific knowledge with ancient wisdom to create a practically applicable method. The basic principle is: Mind Moves Matter.

Everything is Possible

The atom, the building block of matter, is 99.99999999% space filled with life energy. Concrete reality only exists due to our convictions. Quantum mechanics says: we live in a sea of energy with unlimited possibilities.

Everything is Energy

All the ancient cultures had a name for life energy: Ch'i, prana, mana, ki etc. Science talks about zero point energy. This energy is present everywhere. Life energy is fed by attention and directed by intention. That is why anyone can improve the health and vitality of organizations and nature.

In three steps you learn to perceive, interpret and enhance life energy.

1. PERCEIVING LIFE ENERGY

Everything is energy and has a radiance. The radiance in your house influences the mood and health of those who live there. Energetic blockages in an organization generate misunderstanding. Everyone can learn to perceive radiance and life energy. You practice with your hands, a dowsing rod or a pendulum. It doesn't require a special gift. It is the first step in your learning.

2. INTERPRETING LIFE ENERGY

After perceiving, you learn to interpret energy using various parameters. You learn to see and feel what the level and quality is of the energy in nature, in your house and at work. This gives you a new way of looking at your surroundings.

3. ENHANCING LIFE ENERGY

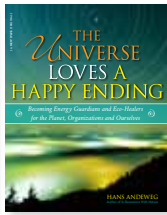

There are many ways to improve the energy in you and your surroundings. You can clean and charge something with positive attention; you can work with homeopathy, Reiki, music, mandalas, symbols, colors, crystals etc. You learn the theoretical context and practical application of this energetic toolkit. Then you can use it yourself.

Universally applicable

In this Intensive you learn a number of principles that are universally applicable. To get familiar with them quickly, we work with plants and trees. To do we regularly spend time outdoors.

Academic Credits

The course is a co-operation between the Ubiquity University and Center for ECOintention. It can be taken for Bachelor's, Master's and PhD credits at Ubiquity University.
