- Balance your own energy

Learning by doing

In the Intensive you will learn a number of principles that can be applied everywhere. To get familiar with them quickly, we practice with plants and food.

Theoretical foundation

The course is based on two books by Hans Andeweg: *The Universe Loves a Happy Ending* and *In Resonance with Nature*. These books provide you with a solid theoretical foundation in energy management.

Life energy

Everything consists of life energy, which is everywhere around you. You need life energy for your health and to achieve what you intend. It's a combination of the right energy, the right flow, and the right goals.

Anyone can do it

Everything has energetic radiance, which is a measure of vitality. The healthy radiance of a field is a prerequisite for good plant growth. The radiance of a house affects the atmosphere and the health of its residents. Everyone can perceive radiance. It does not require a special talent.

THAT'S WHY ENERGY MANAGEMENT IS SO IMPORTANT!

Blockages and energetic stress from wifi transmitters and EMFs can cause your home, garden, or office to take energy from you instead of giving it. You can change that with good energy management.

Center of expertise

Center for ECOintention operates internationally and has been the center of expertise for energy management for more than 25 years. The staff at the Center are experienced and practical, reliable and open minded, focused on vitality and wholeness.

Experienced teacher

Your teacher will be Hans Andeweg, MSc. He is co-founder of Center for ECOintention and is the author of *In Resonance with Nature* and *The Universe Loves a Happy Ending*. Hans has taught and worked with life energy in organizations, companies, and nature reserves for over 25 years.

ECOINTENTION VOCATIONAL TRAINING
